

IFS Power BI Dashboard

Transform data into direction

Uncover meaningful insights and empower decision-makers with the IFS Power BI Dashboard. Built for agility and clarity, this powerful tool enables users to explore complex data with ease - offering visually rich, interactive reporting that supports faster, smarter choices across all levels of the business

Designed with business leaders and analysts in mind, the dashboard helps organisations turn disconnected datasets into coherent, easy-to-navigate visual stories. Whether on desktop or mobile, the platform adapts to your needs and simplifies access to the intelligence that drives growth.

What it offers:

Wide-ranging data integration

Seamlessly connects to ERP systems, CRMs, databases, and major cloud platforms—bringing multiple data sources into one view.

Tailored visual experiences

Customise dashboards to suit business functions or user roles, with a wide array of visual components for clearer storytelling.

Interactive filtering

Instantly refine and segment your view using intuitive, built-in filters—no technical expertise required.

Permission-based sharing

Share dashboards securely with colleagues, departments, or external partners with flexible access controls.

Dynamic visualisation

Bring data to life with engaging, responsive visuals that enhance understanding and collaboration.

Business benefits:

Executive visibility:

Gain a clear, high-level overview of business performance for informed planning and leadership.

Complexity made simple:

Transform intricate datasets into manageable, actionable formats.

Collaboration at scale:

Share insights effortlessly across platforms like Microsoft Teams, SharePoint, or the web.

Insight-driven culture:

While the dashboard itself doesn't perform actions, it sharpens decision-making through timely, accurate insight.

On-the-go access:

Fully optimised for mobile, allowing business users to stay connected and responsive from anywhere.
