

Platned | IFS Cloud™ Enterprise Asset Management (EAM)

Overview

Platned, as a global IFS Gold Services Partner, delivers end-to-end implementation, optimisation and managed support for IFS Cloud EAM. Our tailored approach ensures businesses unlock full asset value, maintain compliance, and drive operational resilience - across energy, power, utilities, manufacturing and more.

Core capabilities

Our EAM solutions support the full lifecycle of physical assets, combining preventive and predictive maintenance strategies to reduce unplanned downtime. With robust workflow control and documentation, organisations can meet audit requirements and regulatory compliance with confidence.

Platned also enables businesses to move beyond reactive operations through AI-driven insights. Condition-based monitoring, embedded analytics, and predictive capabilities help teams make better decisions, faster. With industry experience, we tailor every deployment to your operational environment - whether you manage ageing infrastructure, complex field operations or regulated production assets. Our clients have seen results such as up to 30% downtime reduction and improved ESG tracking.

Through Platned Gateway, we provide continuous support, system checks, hosting, and upgrade services - 24/7. Combined with technical consultancy and expert-led services, we help keep your IFS environment running smoothly at every stage.

Strategic benefits

Our approach helps organisations optimise uptime and lower operational costs through predictive maintenance. Workflow automation supports compliance and audit readiness, while built-in analytics enhance visibility and sustainable asset strategy. The IFS Cloud platform also offers modular, scalable deployment - supporting growth without adding complexity.

Why choose Platned

Strength	Advantage
Gold-level IFS partner	Domain and platform expertise delivering measurable ROI
AI-enabled asset innovation	Active in IFS co-innovation, asset intelligence and predictive maintenance
24/7 managed services	Gateway offers hosting, upgrades and round-the-clock support
Industry-ready solutions	Tailored for sectors such as power, utility, manufacturing and construction

Get started with Platned and IFS EAM

Support starts at implementation and continues through optimisation and fully managed services - all backed by our global, responsive team. Let's optimise your asset portfolio, improve resilience and maximise value.
