

Finance in IFS Cloud™, delivered by Platned

Smarter finance starts here

Get real-time control, automation, and AI-powered insights with **IFS Cloud™**, delivered by Platned. Finance leaders today are expected to be more than number crunchers. They're strategic advisors who need to deliver fast, accurate insights that guide smarter business decisions. Traditional reporting and manual processes can't keep up. Organizations need intelligent tools that automate workflows, ensure compliance with global tax regulations, and adapt to constantly changing financial standards.

With Platned, IFS Cloud Finance offers a complete solution that covers all the essentials - accounts receivable, accounts payable, general ledger, fixed assets, and financial close - plus advanced capabilities for planning, forecasting, and group consolidation. Built-in analytics and automation provide real-time visibility across procurement, supply chain, projects, and manufacturing. Finance teams gain the predictive insights they need to reduce manual work, improve efficiency, and drive sustainable growth.

Spend Analyses and reporting

Benefits

Boost efficiency with connected data

Integrate financial data across systems and cut down on errors with IFS.ai automation.

Take full financial control

Track projects, assets, and company-wide finances with AI-driven insights that help optimize revenue, margins, and costs.

Save time and reduce effort

Automate invoicing, payments, and financial close so your team can focus on strategic work instead of manual tasks.

Make smarter, data-driven decisions

Use real-time reporting and predictive analytics to guide business performance.

General Ledger Dashboard

Key capabilities

Accounting rules

Automate financial transaction rules with AI to ensure consistency, accuracy, and compliance.

Multi-company master data control

Centralize tax rules, accounting definitions, and structures across multiple entities with automated data capture.

General ledger and parallel accounting

Manage multi-entity, multi-currency accounting with AI-enhanced queries, revaluation, and reporting.

Fixed asset management

Automate asset tracking from acquisition to disposal, including depreciation and lease accounting.

Accounts payable and receivable

Speed up AP and AR with AI-powered invoice matching, reconciliation, and payment automation.

E-invoicing

Automate invoice creation and processing while staying compliant with e-invoicing regulations.

Project forecasting

Track financial performance across projects with real-time forecasting and integrated revenue recognition.

Cash planning

Forecast liquidity with AI-driven insights and scenario planning for short-, mid-, and long-term cash flow.

Consolidation

Forecast liquidity with AI-driven insights and scenario planning for short-, mid-, and long-term cash flow.

Financial reporting and analysis

Create interactive reports and dashboards with real-time insights, supported by Excel and Power BI integration.

Cash Planning Multi Company

Why Platned

As an IFS Gold Services Partner, Platned helps US businesses unlock the full value of IFS Cloud™ Finance. From implementation to optimization, we make sure your finance teams gain the automation, compliance, and real-time insights they need to make smarter decisions and support long-term growth.
