

# Operational excellence for U.S. manufacturers using IFS

## Maximizing your IFS investment with expert guidance

Manufacturers rely on IFS to manage fast-paced production environments where accuracy, uptime and efficiency are critical. As an IFS Gold Services Partner, **Platned** works alongside manufacturing organizations to improve everyday performance, increase visibility and deliver continuous value from their IFS systems.

We support every stage of your journey whether you are modernizing your infrastructure, transitioning to **IFS Cloud™**, enhancing reporting and analytics or optimizing day-to-day processes to boost productivity.

## What we do for manufacturers

Our teams bring practical experience across discrete, batch and process manufacturing operations. From costing and production planning to asset maintenance and supply chain execution, we help teams strengthen data quality, resolve system issues and unlock better decision making.

Our support includes:

- IFS Cloud upgrades and Apps version improvements
- Technical and functional consultancy
- Post implementation and continuous improvement services
- 24/7 support with global coverage
- Secure cloud hosting and infrastructure management
- Reporting, automation and system integration

## Results delivered in manufacturing

### Medical and surgical equipment manufacturer | United Kingdom

Migrated from on premise to Microsoft Azure, upgraded Oracle databases and provided full infrastructure and application management resulting in stronger security and system reliability.

### Global dairy nutrition business

Completed a systems health check, upgraded to a newer IFS version and delivered Business Analytics training which improved reporting and operational efficiency across markets.

### Automotive manufacturer

Upgraded an outdated environment, introduced banking integrations and delivered continuous improvements to support evolving production requirements.

### Exhaust and emissions engineering specialist

Implemented IFS Mobile Work Order to remove paper processes and improve technician productivity and reporting accuracy.

### Polymer and engineered materials manufacturer

Enhanced costing and finance capabilities through an IFS Apps 9 implementation leading to improved control and financial visibility.

### Japanese owned organization operating across Europe

Delivered multi country rollout and later upgraded environments with 24/7 support to maintain consistent performance and reporting across regions.

## How Platned keeps your operations moving

### Improving the environment you already rely on

We enhance stability, compliance and usability across your existing IFS solution so production lines, planning teams, maintenance staff and finance leaders can operate with confidence. Better control of procurement, shop floor reporting and inventory helps reduce operational risks and delays.

### Simplifying your upgrade to IFS Cloud

A structured upgrade approach covers readiness checks, process alignment, technical uplift and adoption support. The outcome is a modern platform that supports innovation and future growth.

### Hosting built for reliability

Our managed hosting services on Azure and AWS provide resilient, scalable environments with proactive monitoring, rapid incident response and full administrative support.

### Better insights through integration and analytics

We improve visibility by strengthening reporting, connecting with MES, WMS and CRM solutions and offering automation capabilities such as Mahara and ParsaAI to reduce manual tasks and increase accuracy.

### Supporting international operations

Manufacturers with multi-site or multi country footprints benefit from our global delivery model which ensures consistent processes, aligned upgrades and always on support across every location.

## Why manufacturers choose Platned

Platned combines deep IFS expertise with global delivery across North America, Europe, the Middle East and APAC. We provide end-to-end services that ensure your IFS solution delivers lasting performance and supports business goals well into the future.

## Your long-term partner for success

We help manufacturers extract more value from their IFS technology every day. With Platned, you gain a partner committed to continuous improvement, resilience and operational advantage.
