Platned

Accelerate your shift to IFS Report Studio in IFS Cloud

Why transition away from Crystal Reports

- Support for Crystal Reports ends in IFS Cloud 25r2
- Temporary compatibility only remains in 24r2 and 25r1
- .rpt files must move into IFS Report Studio to stay upgrade ready

What makes reporting upgrades challenging

- Many organizations depend on hundreds of customized Crystal Reports
- Manual rebuilding takes significant time and resources
- Upgrade projects slow down due to the volume of reports involved

Platned's managed conversion service

Faster and more consistent migration to IFS Cloud™

- A complete Crystal Reports to IFS Report Studio conversion service
- Automates up to 60 percent of the workload
- Converts Crystal structures into IFS Report Studio format
- Aligns fields with the IFS XSD schema
- Delivers import-ready .rep layouts
- Frees internal teams for higher value work

How the migration process works

Report analysis
Extracts SQL, fields, sections, subreports and formulas

XSD mapping
Aligns fields, tables and data types

.rep layout generation
Builds tables, headers, footers and field bindings

Final refinements in IFS Cloud
Branding, formatting and formulas completed inside Report Studio

Benefits you can expect

- Faster conversion times
- Standardized layouts for IFS Cloud
- Less pressure on internal reporting staff
- Reliable field mapping
- Smoother planning for future upgrades
- Scales to large report portfolios

Looking ahead with IFS Cloud

- Crystal Reports support removed in IFS Cloud 25r2
- IFS Report Studio becomes the standard for business reporting
- Platned supports a seamless reporting modernization journey
- Reduces long term effort for internal teams

Platned is an IFS Gold Services Partner helping customers complete reporting migration with confidence.
