

Crystal Reports to IFS Cloud Report Studio migration service

Why Crystal Reports must be replaced

- Crystal Reports support ends with IFS Cloud 26R2.
- Integration remains temporarily available in 24R2, 25R1 and 25R2.
- All .rpt files must transition into IFS Report Studio to support future upgrades.

The challenge for IFS customers

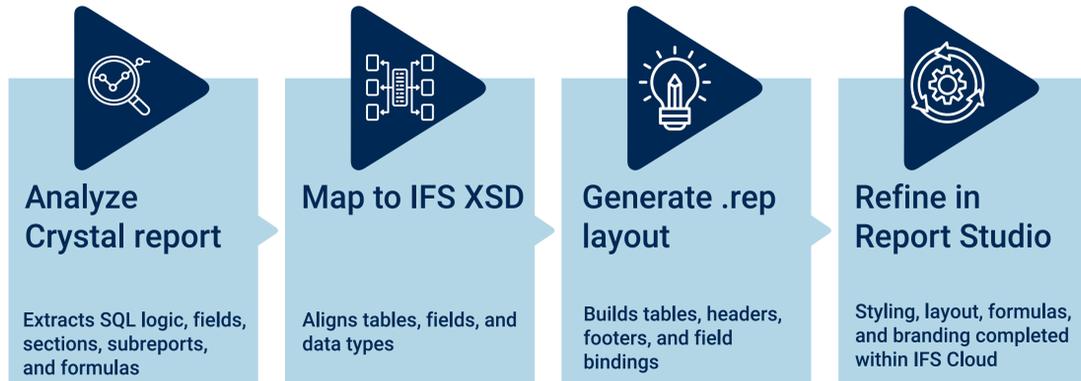

- Many organizations rely on hundreds of custom Crystal Reports.
- Manual recreation can take days or even weeks per report.
- Upgrade programs are delayed by the volume of reporting effort required.

The Platned approach

- A managed Crystal to IFS Cloud Report Studio migration service.
- Automates up to 60 percent of the conversion workload.
- Transforms Crystal report structures into IFS Report Studio format.
- Maps fields using the IFS XSD schema.
- Delivers import-ready .rep files.
- Minimizes demand on internal teams.

How the migration works

What you gain

Faster migration timelines

Standardized IFS Cloud layouts

Reduced pressure on internal teams

Accurate field mapping

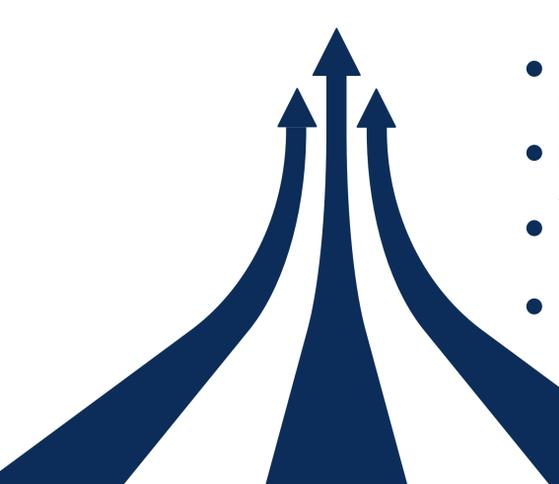

Predictable upgrade planning

Scalable for large report libraries

Looking ahead with IFS Cloud

- Crystal Reports removed in IFS Cloud 26R2.
- IFS Report Studio becomes the standard for operational reporting.
- Platned supports reporting modernization end to end.
- Reduced effort for internal teams.

Platned is an IFS Gold Services Partner. Contact us to make your Crystal to IFS Cloud Report Studio migration faster, simpler, and more predictable.
