

IFS Cloud Success with Platned

One platform. One partner. Real business outcomes.

IFS Cloud brings together **ERP, EAM, FSM, and Service Management** in a single, modern cloud platform. Paired with Platned's proven delivery expertise, organizations can realize value faster - with lower risk and greater confidence.

The power of IFS Cloud

IFS Cloud provides a unified solution that enables organizations to:

- Run finance, projects, supply chain, manufacturing, service, and asset management on **one integrated platform**.
- Gain **real-time visibility** across operations, performance, and financials.
- Leverage **industry-ready functionality** with minimal customization.
- Benefit from **flexible cloud deployment**, continuous innovation, and regular releases.
- Empower teams with **mobile access, analytics, and decision support**.

Why Platned

A proven delivery approach

Platned delivers all IFS projects using its Pathway methodology, providing structure, transparency, and control at every stage - while retaining the flexibility to adapt to changing business priorities.

End-to-end lifecycle support

From strategy to optimization, Platned supports the full IFS lifecycle, including implementation, upgrades, integrations, testing, release management, and ongoing managed services.

Business-first configuration

Solutions are configured around real operational and financial processes - driving faster user adoption and enabling better day-to-day decision making.

Extending and protecting your investment

Platned enhances IFS Cloud with specialist solutions that increase value and reduce risk:

- **Platned Mahara** - automated testing and release assurance.
- **ParsaAI** - intelligent invoice matching and finance automation.
- **Integration and data platforms** - seamless connectivity across your application landscape.
- **Analytics and reporting solutions** - deeper insight and performance management.

Global reach, local expertise

With delivery teams across the UK, Nordics, US, Australia & New Zealand, Middle East, and South Asia, Platned combines local expertise with a global delivery model - ensuring consistent quality, access to specialist skills, and scalable support as organizations grow.

The combined value

Together, IFS Cloud and Platned enable organizations to:

- Achieve end-to-end visibility across operations, projects, and finance.
- Reduce risk during implementations, upgrades, and major change.
- Improve efficiency, reliability, and user adoption.
- Accelerate time to value from new functionality.
- Build a secure, scalable foundation for long-term growth.
